www.krohne.com

with its head office in Duisburg, Germany, is a full-service provider for process measuring technology for the measurement of flow, mass flow, level, pressure and temperature as well as analytical tasks. The learning platform KROHNE Academy online gives you direct access to the knowledge and vast experience of one of the leading suppliers in industrial process measurement. Our platform is dedicated to people involved in process measurement who come into contact with different measurement principles on a daily basis, as well as to students or to interested parties who wish to bring their knowledge of measurement techniques and applications in technical installations up-to-date. For our Web Based Training no special knowledge is required, but it is useful to have a technical understanding.

KROHNE

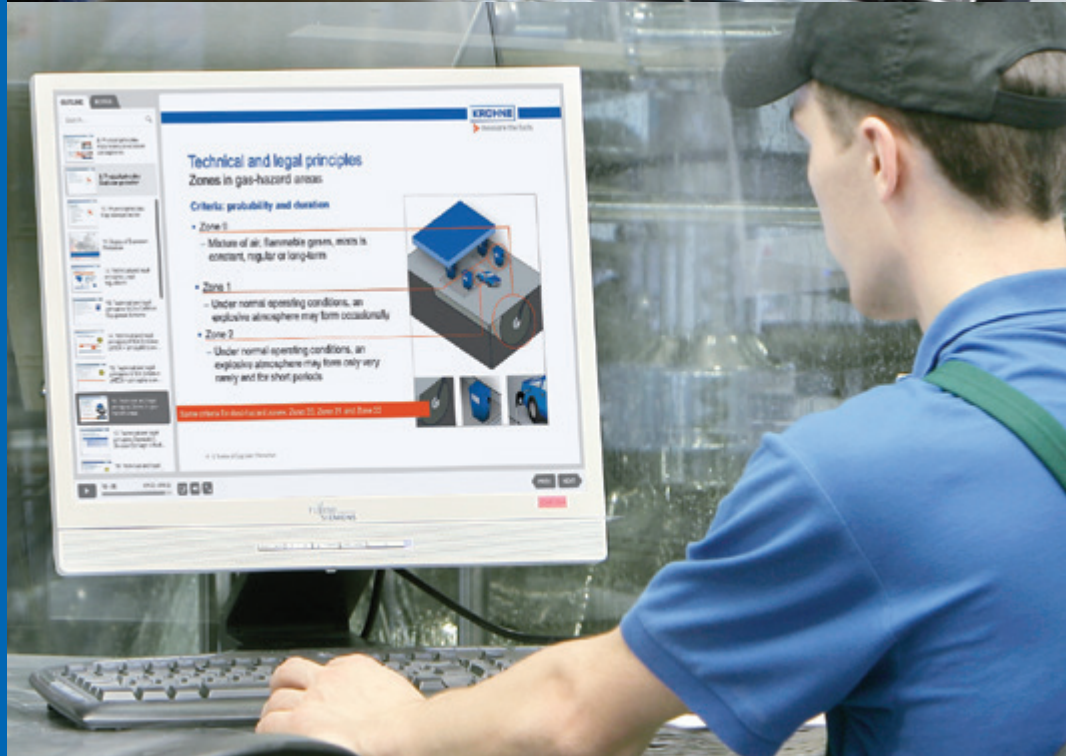

▶ What is the KROHNE Academy online about?

- Learning platform with focus on industrial process measurement
- Features audio enhanced digital eLearning courses on lots of topics, including measuring principles, basics of gas measurement, pipeline leak detection or general topics such as explosion protection or principles of hygiene for the food processing industry
- Cooperation with other companies on standards and regulations, such as the eLearning course "Functional safety (SIL)"

▶ What benefits does the online platform provide?

- Registration and use are completely free of charge
- Commercial-free instructional material in up to five languages
- Independent of time and place
- Learn at your own pace
- Certificate of completion
- Online access to the technical knowledge library of one of the leading manufacturers of solutions for industrial process instrumentation

▶ Where can you find our Web Based Training?

Our web-based training is provided on our academy learning platform ILIAS. Here you will find learning content on various topics in multiple languages. The mobile-optimised platform is simple and intuitive to use.

For any questions, you can get in contact with us on our platform.
